

SOAP2REST Bridge

Document 03 - App Flow & User Journey Map

Pages List

1. Landing Page (/)
2. Login Page (/login)
3. Register Page (/register)
4. Dashboard (/dashboard)
5. WSDL Upload & Parser (/wsdl-upload)
6. API Mapping Console (/mapping)
7. Generated APIs (/apis)
8. API Testing Sandbox (/sandbox)
9. Analytics Dashboard (/analytics)
10. API Key Management (/apikeyes)
11. User Settings (/settings)

Navigation Structure

Left Sidebar Navigation: Dashboard → WSDL Upload → Mapping Console → APIs → Sandbox → Analytics → API Keys → Settings

First Screen

New users land on the Landing Page where they can learn about the platform, view product features, and choose Login or Register.

Authentication Flow

Register → Email Verification → Login → Dashboard

Core User Journey 1 - Create a SOAP Bridge

Login → Dashboard → Upload WSDL → Parse Operations → AI Generates Field Mappings → Review Mapping → Generate REST APIs → Publish Bridge → Test APIs

Core User Journey 2 - API Testing

Dashboard → Generated APIs → Select Endpoint → Enter JSON Request → Runtime Proxy Converts JSON to SOAP → SOAP Service Response → JSON Response Displayed

Core User Journey 3 - Monitoring

Dashboard → Analytics → View Request Count → Monitor Latency → Analyze Error Rates → Export Logs

Empty States

- No WSDL Uploaded Yet
- No APIs Generated Yet
- No Analytics Data Available
- No API Keys Created

Error States

- Invalid WSDL File
- SOAP Service Unreachable
- Authentication Failed
- API Key Invalid
- Runtime Proxy Conversion Error

Modal & Overlay Interactions

- Create API Key Modal
- Delete API Confirmation Modal
- Mapping Approval Dialog
- Error Details Popup
- Analytics Export Dialog

Redirect Logic

- After Login → /dashboard
- After Logout → /
- After WSDL Upload → /mapping
- After Mapping Approval → /apis
- After API Generation → /sandbox
- Invalid Session → /login
