

# **AI SOAP to REST Bridge - Complete Sample Data Document**

This document provides realistic sample SOAP/XML and REST/JSON data that can be used during project demonstrations, prototype rounds, testing, and interviews.

## Sample 1 - Customer Registration

REST Request:

```
{  
  "customerId": 1001,  
  "name": "Asta",  
  "email": "asta@gmail.com",  
  "phone": "9876543210",  
  "city": "Coimbatore"  
}
```

SOAP Request:

```
1001  
Asta  
asta@gmail.com  
9876543210  
Coimbatore
```

REST Response:

```
{  
  "status": "SUCCESS",  
  "message": "Customer Created"  
}
```

## Sample 2 - Customer Search

REST Request:

```
{  
  "customerId": 1001  
}
```

SOAP Request:

```
1001
```

REST Response:

```
{  
  "customerId": 1001,  
  "name": "Asta",  
  "email": "asta@gmail.com",  
  "city": "Coimbatore"  
}
```

## Sample 3 - Banking Account Lookup

REST Request:

```
{  
  "accountNumber": "ACC123456"  
}
```

SOAP Request:

ACC123456

REST Response:

```
{  
  "accountHolder": "Asta",  
  "balance": 50000,  
  "status": "ACTIVE"  
}
```

## Sample 4 - Employee Information

REST Request:

```
{  
  "employeeId": "EMP100"  
}
```

SOAP Request:

EMP100

REST Response:

```
{  
  "employeeId": "EMP100",  
  "name": "John",  
  "department": "IT",  
  "salary": 65000  
}
```

## Sample 5 - Product Details

REST Request:

```
{  
  "productId": "P100"  
}
```

SOAP Request:

P100

REST Response:

```
{  
  "productName": "Laptop",  
  "price": 55000,  
  "stock": 25  
}
```

```
}
```

## Sample 6 - Order Creation

REST Request:

```
{  
  "orderId":"ORD001",  
  "customerId":"1001",  
  "productId":"P100",  
  "quantity":2  
}
```

SOAP Request:

```
ORD001  
1001  
P100  
2
```

REST Response:

```
{  
  "status":"ORDER_CREATED",  
  "orderId":"ORD001"  
}
```
